## Summary of Information

The target consists of a scene reminiscent of a painting or a picture of a painting. The context of the scene consists of several characters. A man with dark hair is predominate as is a rather fat woman who is dancing or is posed in such a way as to suggest dancing. She is either partially clothed or positioned in such a way that she appears to be partially clothed. There is a strong floral smell reminiscent of perfume associated with the scene.

There are two men facing each other as they lift something together between them. Another person is looking on, observing these two men and their task at hand. There are several shades of gray. There is an indistinct separation between the other colors present.

There is the face of a dog or wolf as well as that of a fox. There is also a large bird, possibly a parrot nearby. Something within the scene is sliding sideways.

There is a large, central tree. More people are present and are walking through the trees but only their faces are really distinguishable. They appear to be scattered throughout the scene. The word "MONROVIA" is perceived. There are roses present and someone is thinking, "that's one of the cures". A cure to what, I don't know.
